Authorization for this examiner's amendment was given in a telephone interview with Wei Te Chung on 09/23/2004. The application has been amended as follows:

Claims 4, 5, and 16 have been cancelled.

Claim 1, line 8, after "boards" insert -- wherein the connector comprises an actuator for applying a driving force to the contact to move a first end of the contact along the first printed circuit board and to move a second end of the contact along the second printed circuit board, wherein the connector has a mating face facing the first printed circuit board and a mounting face facing the second printed circuit board, and wherein the connector defines a plurality of passageways between the mating face and the mounting face and in which the contacts are moveably received --.

Claim 6, line 1 change "claim 5" to -- claim 1--.

Claim 7, line 1 change "claim 5" to --claim 1--.

Claim 14, line 14, after "pads" insert -- wherein the first and the second electrical connectors each comprise contacts and an actuator adapted for actuating end portion of the contacts to electrically contact with the another printed circuit board--.

Claim 17, line 1 change "claim 16" to --claim 14--.

### **REASONS FOR ALLOWANCE**

The following is an examiner's statement of reasons for allowance:

No prior art has been found to anticipate or render obvious the presently claimed subject matter.

Specifically, none of the prior art of record discloses the combination of the limitations presented including the actuator adapted for actuating end portion of the contacts to electrically contact with the another printed circuit board (claim 14)
